

mangoO Microfinance Management v2.3.0

- User Manual -

mangoO Microfinance Management is a software solution for small scale (usually single-branch) micro-finance institutions. It was first developed for Luweero Diocese SACCO (Savings and Credit Cooperative) in Luweero, Uganda.

1 Getting Started

As mangoO is based on web technology, you will need a web browser to use the program. It is recommended to use Mozilla Firefox, Chrome, or Chromium. Your administrator should have provided you with an address or link to gain access to mangoO.

On the start page of mangoO, please provide a valid **user name** and **password**. In case you do not possess such login information, please contact your system administrator.

Overdue Subscription Fees		
Cust. No.	Customer Name	Last Paid
22/2006	Arnetta Lobato	25.09.2013
11/2006	Nydia Melvin	18.01.2014
13/2006	Melania Mitchem	14.05.2014

Defaulted Loan Instalments

L 196-1	Nan Amarante	30.06.2015	355,000 UGX

1.1 The User Dashboard

After logging in, the system will take you to the **user dashboard**. Depending on the system's basic settings, you will find different types of information (see 7.1).

The *Overdue Subscription Fees* list will display all customers whose **annual subscription** has expired. In order to access a customer's record, click the respective customer number. Depending on the respective setting (see 7.1), customers might automatically be set to inactive, if their subscription has expired.

The *Defaulted Loan Instalments* table shows all currently **defaulted loan installments**. In order to access the loan's record, click the respective loan number. Depending on the respective setting (see 7.2), defaulters might automatically be charged a predefined default fine which will be deducted from their savings accounts.

The options in the upper menu bar give you quick access to the most frequently used functions. **Search Customers** accesses the customer search form (see 2.1), **Search Loan** the loan search form (see 4.1), and **New Customer** allows you to create a new customer record (see 2.2).

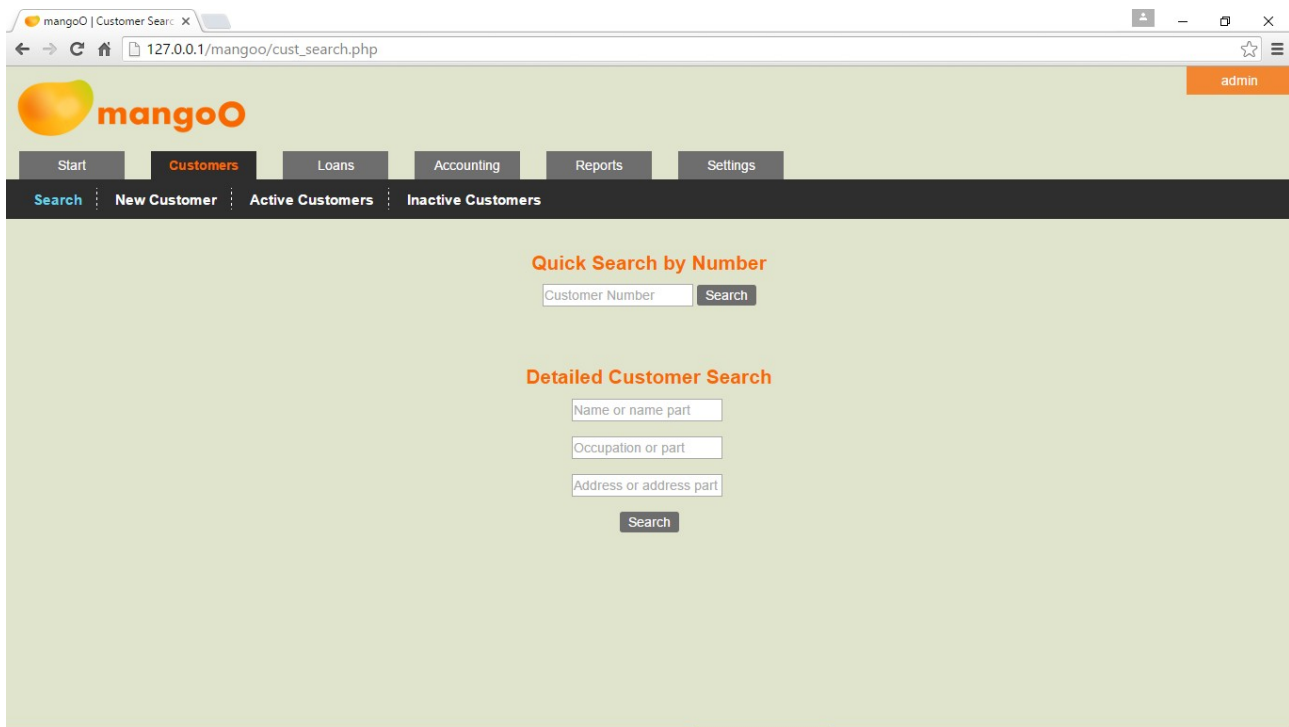

2 Customers

Under the tab **Customers** you will find all tools for managing customer records.

2.1 Customer Search

The customer search form allows you to search the database for customers. The upper input field is

used to search to perform a **quick search by number**. Since customer numbers are unique identifiers, you will be taken directly to the respective record (as long as the specified customer number exists). If a given number does not exist in the database, an error message will appear.

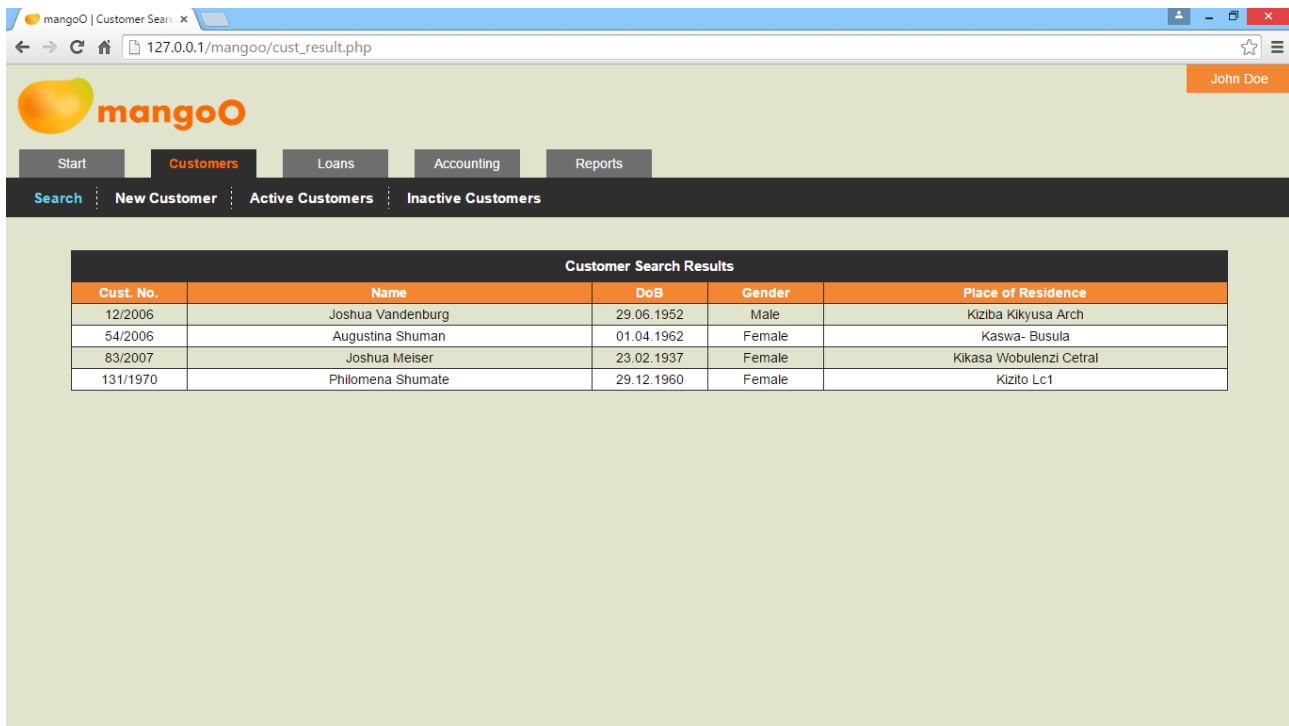

The screenshot shows a web browser window with the URL `127.0.0.1/mangoo/cust_search.php`. The page features the mangoO logo and a navigation bar with tabs for Start, Customers (selected), Loans, Accounting, Reports, and Settings. Below the navigation bar, there are links for Search, New Customer, Active Customers, and Inactive Customers. The main content area is divided into two sections: "Quick Search by Number" and "Detailed Customer Search". The "Quick Search by Number" section has a single input field labeled "Customer Number" and a "Search" button. The "Detailed Customer Search" section has three input fields labeled "Name or name part", "Occupation or part", and "Address or address part", each followed by a "Search" button.

The lower input field allows for **searches by customer details** such as name or name part, occupation or part of it, address or address part. As such details are, by nature, ambiguous, the search will take you to a result page. The result list can be exported by clicking [Export](#).

mangoO will search for any customer on the database whose details match **all** specified search criteria. For example, a search for occupation *teacher* and address *Luweero* will yield a list of all customers who work as teachers within Luweero. Customers who are teachers but reside in other places will not be included.

The search is furthermore case-insensitive and works regardless of the search term's position within the respective data field. For example, a search for the name string *shu* will yield *Shumate* as well as *Joshua*. If a given search criteria does not match with any details in the database, the search result list will remain empty.

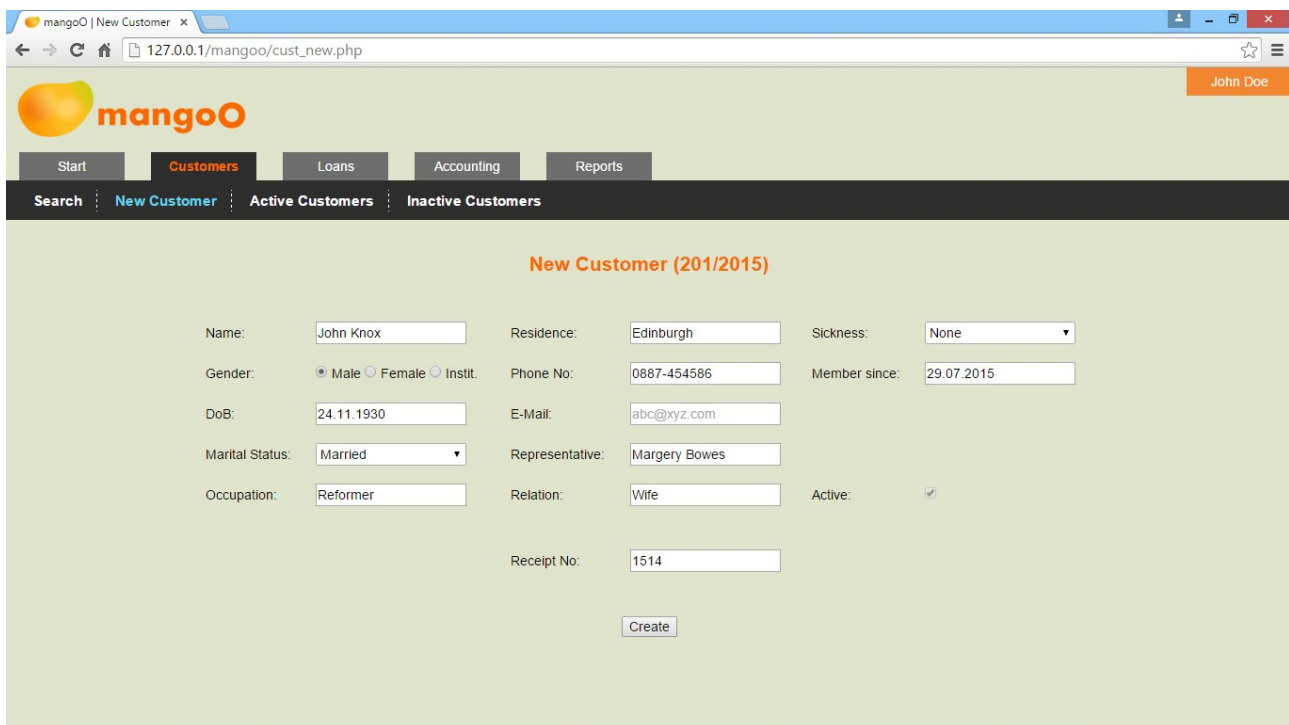

Customer Search Results				
Cust. No.	Name	DoB	Gender	Place of Residence
12/2006	Joshua Vandenburg	29.06.1952	Male	Kiziba Kikyusa Arch
54/2006	Augustina Shuman	01.04.1962	Female	Kaswa- Busula
83/2007	Joshua Meiser	23.02.1937	Female	Kikasa Wobulenzi Cetral
131/1970	Philomena Shumate	29.12.1960	Female	Kizito Lc1

In order to access a customer's record from the search result page, click the respective customer's number.

2.2 New Customer Record

This page allows you to enter a new customer record into the database.

New Customer (201/2015)

Name: Residence: Sickness:

Gender: ☒ Male ☐ Female ☐ Instit. Phone No: Member since:

DoB: E-Mail:

Marital Status: Representative:

Occupation: Relation: Active: ☒

Receipt No:

Customer numbers are automatically generated and assigned by the system and cannot be altered by

the user.

The fields for name, date of birth, place of residence, and phone number are compulsory to fill. In addition, mangoO will perform consistency checks on entered phone numbers and email addresses.

The system will automatically assume the current date to be the date when the new customer registered with the institution. In case the customer joined at an earlier date, you may adjust the value of **Member since** accordingly. Please note that throughout mangoO, all dates must be given in the format DD.MM.YYYY (for example 03.01.2016).

New customers are by definition considered to be active. Thus, the activity status cannot be changed on registration. Finally, a receipt number for the entrance fee must be specified.

On clicking **Continue**, the new record will be written to the database. In a next step, mangoO will allow you to upload a digital picture of the respective customer. Permissive file formats are JPG, JPEG, PNG, TIF, and TIFF. In case you do not wish to upload a picture, choose **Skip**.

2.3 Predefined Lists for Customers

In addition to the search function, mangoO offers two predefined lists of customers by status.

2.3.1 List of Active Customers

The short link **Active Customers** will show a list of all customers whose status is currently set to **Active**. You may access a particular record by clicking the respective customer number.

Clicking **Export** above the list will generate an XLS file which can then be altered, printed, sent, or otherwise used outside mangoO.

2.3.2 List of Inactive Customers

The short link **Inactive Customers** will show a list of all customers whose status is currently inactive. You may access a particular record by clicking the respective customer number.

Clicking **Export** above the list will generate an XLS file which can then be altered, printed, sent, or otherwise used outside mangoO.

2.4 Customer Details Page

When retrieving a customer's record, either through searching or through selection from one of the lists, mangoO displays all information on the respective customer on a comprehensive details page.

2.4.1 Basic Customer Data

The data fields on the left-hand side show the customer's basic data. They can be changed any time by overwriting the respective field and clicking **Save Changes**.

Every data update will be logged by the system and displayed in **Updated on / by**. Due to the nature of the information, the data in **Member since**, **Subscription paid until**, and **Updated on / by** cannot be changed manually.

2.4.1.1 Customer's Photo

The small picture icon next to the customer's name indicates whether or not a photo has been uploaded for the respective customer (see 2.2). A coloured icon represents an existing picture. Click the icon to view the customer's photograph. A grey-scale icon indicates a missing picture. Click the icon to upload a new photograph for the respective user.

The screenshot shows the mangoO Customer profile page for Jean Calvin (3/2006). The page is divided into several sections:

- Header:** mangoO logo, navigation tabs (Start, Customers, Loans, Accounting, Reports, Settings), and a search bar.
- Customer Details:**
 - Name: Jean Calvin, Residence: Geneva, Sickness: None
 - Gender: Male (selected), Phone No: 0760-548193, Member since: 07.09.2006
 - DoB: 21.11.1961, E-Mail: j.calvin@reformed.org, Subscription paid until: 01.01.2016
 - Marital Status: Married, Representative: Marie Calvin, Updated on / by: 31.07.2015 / admin
 - Occupation: Reformer, Relation: Wife, Active: ☒
- Buttons:** Update Data, Membership
- Savings Account (Recent Transactions):**

Date	Transaction Type	Amount	Receipt/Slip
03.05.2015	Deposit	15,000 UGX	R 123
22.06.2015	Deposit	80,000 UGX	R 456
09.07.2015	Withdrawal	-40,000 UGX	S 100
09.07.2015	W/drawal Fee	-1,000 UGX	R 789
02.10.2015	Deposit	64,000 UGX	R 1011
Balance: 122,000 UGX			
- Loans Account:**

No.	Status	Total Repay	Remaining	Rate Due
- Share Account:**

Number of Shares	Value of Shares
6	120,000 UGX

2.4.2 Membership Renewal

In case the **annual subscription** check has been enabled (see 7.1) and the customer's subscription has expired, a warning message will appear and mangoO will automatically show a renewal form below the customer's basic data.

By default, the system assumes the current date to be the date of membership renewal. Should the customer have renewed his membership earlier, please adjust the date accordingly. You must then specify a receipt number and choose whether or not the subscription fee should be deducted from the customer's savings account. Clicking **Renew Membership** will renew the customer's subscription for one year and automatically set his status to active.

The screenshot shows the mangoO Customer interface. The top navigation bar includes 'Start', 'Customers', 'Loans', 'Accounting', 'Reports', and 'Settings'. Below this is a secondary menu with 'Search', 'Deposit', 'Withdrawal', 'Add Shares', 'New Loan', 'New Customer', 'Active Cust.', and 'Inactive Cust.'. The main content area is titled 'Jean Calvin (3/2006)'. It contains a form for customer details: Name (Jean Calvin), Residence (Geneva), Sickness (None), Gender (Male), Phone No. (0760-548193), Member since (07.09.2006), DoB (21.11.1961), E-Mail (j.calvin@reformed.org), Subscription paid until (01.01.2016), Marital Status (Married), Representative (Marie Calvin), Updated on / by (31.07.2015 / admin), Occupation (Reformer), Relation (Wife), and Active (checked). There are 'Update' and 'Renew' buttons. Below the form is a light blue box with a date field (31.07.2015), a 'Receipt No.' field, a checkbox for 'deduct from Savings', and a 'Renew Subscription' button. On the right, there are three summary tables: 'Savings Account (Recent Transactions)', 'Loans Account', and 'Share Account'.

Date	Transaction Type	Amount	Receipt/Slip
01.01.2015	Deposit	4,000 UGX	R 0
Balance: 4,000 UGX			

No.	Status	Total Repay	Remaining	Rate Due
-----	--------	-------------	-----------	----------

Number of Shares	Value of Shares
2	40,000 UGX

2.4.3 Accounts' Details

The right-hand section provides you with a summary of the customer's accounts. For the sake of space, the **savings account table** will show the five most recent transactions only. You may access a complete list of all transactions on the savings account by clicking **Savings Account** in the table header. The shared column for Receipt / Slip numbers indicates the nature of a given number by a preceding *R* for receipts and a preceding *S* for withdrawal slips. (See 3.2 for further details on the savings account.)

The **loans account table** shows all past and recent loans. You can access the details of a particular loan by clicking on the loan number. (See 4 for further details on the loans account.)

Lastly, the **share account table** gives a summary on the currently owned number of shares and the combined value of these shares. Clicking on **Share Account** in the table header will take you to the share account with a complete list of all transactions. (See 3.1 for further details on the share account.)

2.4.4 Additional Options in the Menu Bar

When viewing customer details, the menu bar above provides you with a number of different options regarding that respective customer.

The screenshot shows a dark menu bar with the following options: Search, Deposit, Withdrawal, Add Shares, New Loan, New Customer, Active Cust., and Inactive Cust.

The options **Deposit** and **Withdrawal** will both take you to the customer's savings account where you may perform either operation (see 3.2).

The **Add Shares** option will take you to the customer's share account where you may add or transfer shares. (See chapter 3.1 for more information.)

The **New Loan** option allows you to create a new loan application for the customer (see 4.4).

3 Account Types

By default, mangoO keeps three different accounts for each customer: Share Account, Savings Account, and Loans Account.

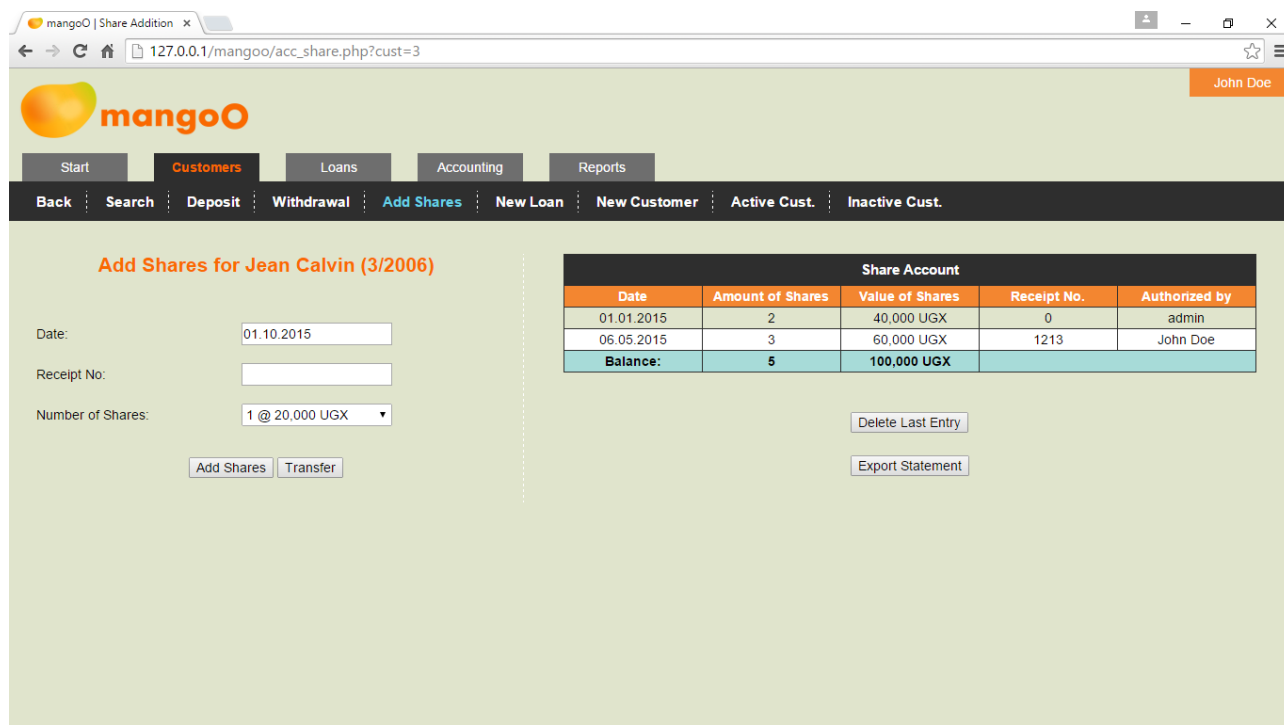

3.1 Share Account

You may access a customer's share account either by clicking **Share Account** in the table header on the customer's details page, or through the **Add Shares** option in the menu bar above the customer's basic information.

3.1.1 Retrieving account information

The share account page is divided into two sections. The **right-hand** side will provide you with a comprehensive list of all transactions on the customer's share account. Clicking the Delete-icon allows authorised users (see 7.5) to delete the respective transaction after entering a security captcha.

Clicking **Export** will generate an XLS file containing the complete history of transactions on this account.

Delete Last Entry

Export Statement

3.1.2 Adding more shares to a customer's account

The form on the **left-hand** side allows you to add more shares to a customer's account. The system will assume the current date to be the date of share acquisition. In case the customer bought his additional shares at an earlier date, please adjust the date accordingly. Specifying a receipt number for the transaction is compulsory. The drop-down field *Number of Shares* allows you to choose the number of shares bought by the customer. The system will automatically calculate the amount due, based on the current price for one share. (This information can be edited by authorised users only. See 7 for more details.)

3.1.3 Transfer of shares

In case a customer wishes to terminate his membership with your financial institution, you may use **Transfer** to transfer shares from another customer **to the currently displayed account**. In order to do that, please choose from the drop-down field the customer who is ending his membership and click **Transfer Shares**. The currently displayed customer will then be credited with all the shares previously owned by the leaving customer. The share account of the leaving customer will be set to zero and his membership will be deactivated.

3.2 Savings Account

You may access a customer's savings account by either clicking *Savings Account* in the table header on the customer's details page, or through either the *Deposit* or the *Withdrawal* option in the menu bar above the customer's basic information.

3.2.1 Retrieving account information

The savings account page is divided into two sections. The **right-hand** side will provide you with a comprehensive list of all transactions on the customer's savings account. Clicking the Delete-icon allows authorised users (see 7.5) to delete the respective transaction after entering a security captcha.

Clicking **Export** will generate an XLS file containing the complete history of transactions on this savings account.

3.2.2 Deposits

Depending on the option you chose, the form on the **left-hand** side allows you to conduct deposits on the customer's savings account. The system will assume the current date to be the date of the transaction. In case the customer deposited at an earlier date, please adjust the date accordingly. Specifying a receipt number for the transaction is compulsory. The amount is to be entered in the bottom-most field.

3.2.3 Withdrawals

Depending on the option you chose, the form on the **left-hand** side allows you to conduct

withdrawals from the customer's savings account. The system will assume the current date to be the date of the transaction. In case the customer withdrew at an earlier date, please adjust the date accordingly. Specifying a withdrawal slip number as well as a receipt number for the transaction is compulsory. The bottom-most checkbox allows you to have the withdrawal fee deducted from the savings account. In this case, the charged fee will appear as a separate transaction on the account, showing the same date, receipt, and slip number as the original withdrawal itself.

Since the withdrawal fee is an income for the financial institution, mangoO will always insert the specified fee for all withdrawals into the incomes record in the accounting section. (The amount of the fee, however, can be edited by authorised users only. See 7 for more information.)

Withdrawal for Jean Calvin (3/2006)

		Balance: 122,000 UGX			

3.3 Loans Account

As the Loans Account is the most complex of all account types, the topic of loans is covered in a separate chapter. Therefore, kindly refer to chapter 4 for more information.

4 Loans

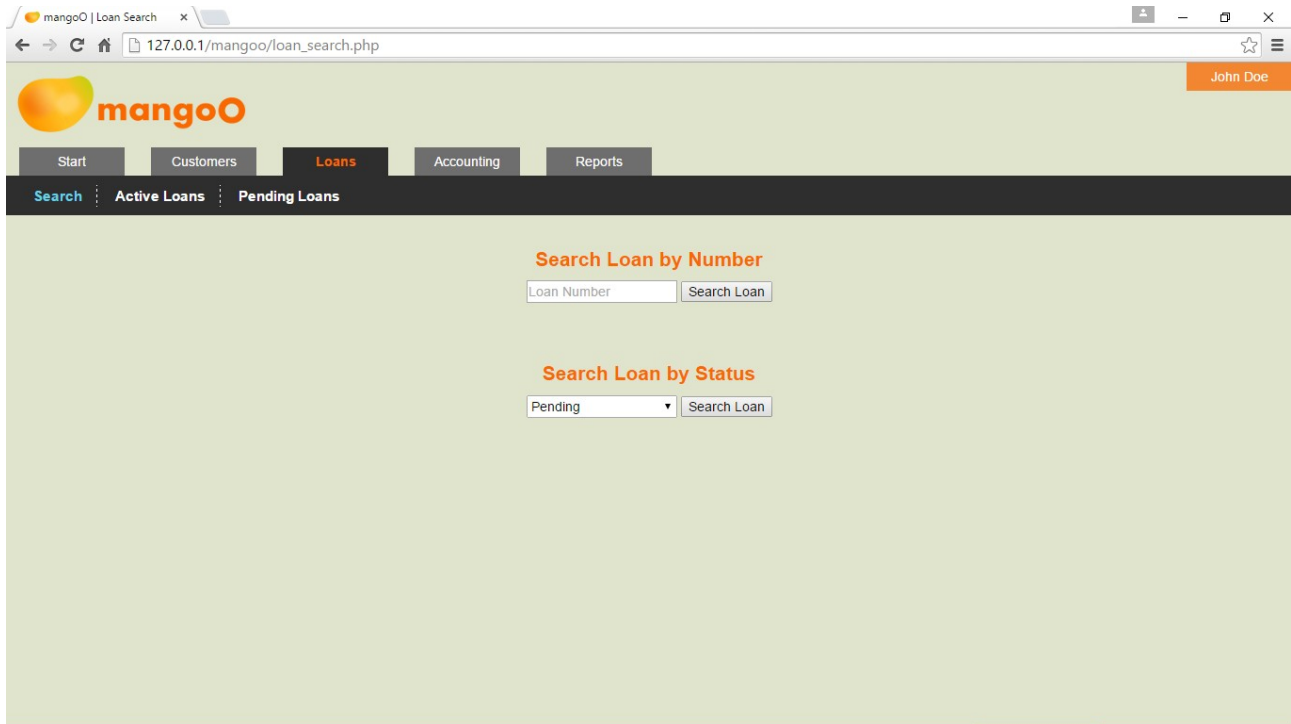

There are two ways of accessing a particular loan. One is to retrieve the details of the respective borrower. In the section displaying a customer's accounts, the loans table will show all past and recent loans. You can access the details of a particular loan by clicking on the loan number. (See also 2.4.3.)

Alternatively, you may search for a particular loan number straightaway. Selecting the *Loans* tabs

will take you to a search form for loans.

4.1 Loan Search

The upper input field is used to search for loans **by number**. Enter the loan number (or part of it) into the input field and click **Search**. The search result list will show all loans whose numbers match with the specified search term. You may access a particular record by clicking on the respective loan number. If a given number does not exist in the database, the search result list will be empty.

The screenshot shows a web browser window with the URL 127.0.0.1/mangoo/loan_search.php. The page has a header with the mangoO logo and a user profile for John Doe. A navigation bar contains links for Start, Customers, Loans (highlighted), Accounting, and Reports. Below this is a sub-navigation bar with Search, Active Loans, and Pending Loans. The main content area features two search sections. The first section, 'Search Loan by Number', has a text input field labeled 'Loan Number' and a 'Search Loan' button. The second section, 'Search Loan by Status', has a dropdown menu currently set to 'Pending' and a 'Search Loan' button.

The lower input field allows for **searches by status**. Select a particular status from the list and click **Search**. The mangoO system will provide you with a search result list including all loans that have the respective status. You may access a particular record by clicking on the respective loan number.

4.2 Predefined Lists for Loans

In addition, mangoO offers two predefined lists of loans by status.

4.2.1 List of Active Loans

The short link *Active Loans* will show a list of all loans whose status is currently set to *active*. You may access a particular record by clicking on the respective loan number.

Clicking **Export** will generate an XLS file which can then be altered, printed, sent, or otherwise used outside mangoO.

4.2.2 List of Pending Loans

The short link *Pending Loans* will show a list of all loans whose status is currently set to *pending*. You may access a particular record by clicking on the respective loan number.

Clicking **Export** will generate an XLS file which can then be altered, printed, sent, or otherwise used outside mangoO.

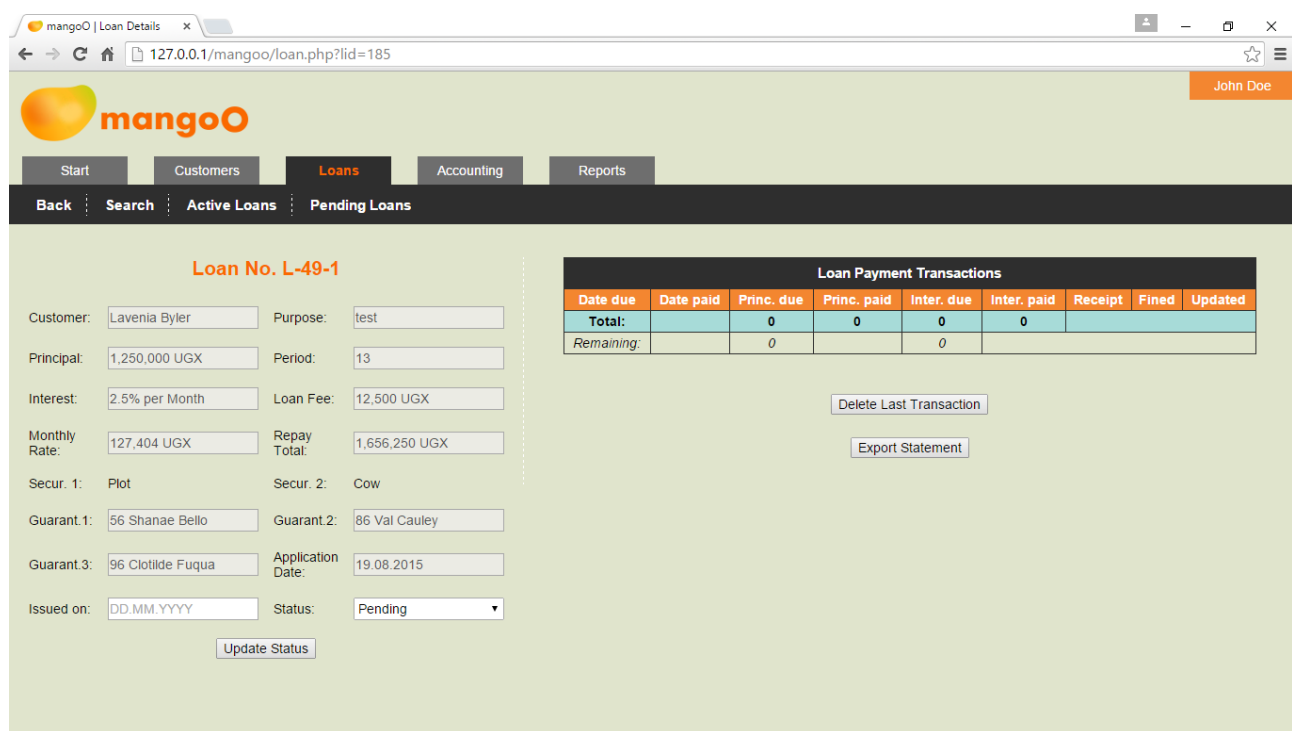

4.3 Loan Details Page

After accessing a particular loan, either through searching or through the account of the borrowing customer, mangoO will provide you with a comprehensive overview of all details concerning the respective loan.

4.3.1 Basic Loan Data

The left-hand section of the page presents all basic data about the loan. Apart from the status, none of this information can be changed manually.

In case a document or photograph was attached to one or both securities while entering the loan (see 4.4), those files can be accessed by clicking on the respective security.

The screenshot displays the 'Loan Details' page in the mangoO application. The browser address bar shows the URL '127.0.0.1/mangoo/loan.php?lid=185'. The user 'John Doe' is logged in. The navigation menu includes 'Start', 'Customers', 'Loans' (selected), 'Accounting', and 'Reports'. The sub-menu shows 'Back', 'Search', 'Active Loans', and 'Pending Loans' (selected).

Loan No. L-49-1

Customer: Lavenia Byler Purpose: test

Principal: 1,250,000 UGX Period: 13

Interest: 2.5% per Month Loan Fee: 12,500 UGX

Monthly Rate: 127,404 UGX Repay Total: 1,656,250 UGX

Secur. 1: Plot Secur. 2: Cow

Guarant. 1: 56 Shanae Bello Guarant. 2: 86 Val Cauley

Guarant. 3: 96 Clotilde Fuqua Application Date: 19.08.2015

Issued on: DD.MM.YYYY Status: Pending

Loan Payment Transactions

Date due	Date paid	Princ. due	Princ. paid	Inter. due	Inter. paid	Receipt	Fined	Updated
Total:		0	0	0	0			
Remaining:		0		0				

Buttons: Delete Last Transaction, Export Statement, Update Status

After entering a new loan (see 4.4) into the system, mangoO will automatically have set the status of that loan to *Pending*. Such a loan is registered because it was applied for by one of the institution's customers. However, a pending loan has not yet been approved, let alone issued.

4.3.1.1 Rejecting a Pending Loan

On pending loans, the only option is to update the status of that loan. In case a loan application has been **rejected**, the loan status must be set to *Refused* and **Update Status** must be clicked. Please note that even rejected loans will remain on the system for later reference.

4.3.1.2 Approving a Pending Loan

In case a loan application has been **approved**, the loan status must be set to *Approved*. In addition, the date of issuing must be provided in the DD.MM.YYYY format. On clicking **Update Status**, the system will prompt you to specify the receipt number for the loan fee.

When a loan is approved, mangoO will generate a list of expected loan repayment transactions on the right-hand side of the page (see 4.3.2). Please note that due dates are calculated based on the date of issuing and that 31 days are allowed between payment dates.

4.3.2 Loan Payment Transactions Data

The right-hand section of the page presents data about loan payment transactions. While a loan is still pending, this section will be empty. On approval, the system will automatically have generated a list of expected loan repayment transactions (see 4.3.1.2). Please note that due dates are calculated based on the date of issuing and that 31 days are allowed between payment dates.

The screenshot shows the mangoO web application interface. The top navigation bar includes 'Start', 'Customers', 'Loans', 'Accounting', and 'Reports'. Below this, there are tabs for 'Back', 'Search', 'Active Loans', and 'Pending Loans'. The main content area is titled 'Loan No. L 100-2'. On the left, there is a form for loan details with fields for Customer (Sherly Boudreau), Purpose (test), Principal (850,000 UGX), Period (6), Interest (2.5% per Month), Loan Fee (8,500 UGX), Monthly Rate (162,917 UGX), Repay Total (977,500 UGX), Secur. 1 (test), Secur. 2 (2 Jan Hus), Guarant. 1 (1 Martin Luther), Guarant. 2 (2 Jan Hus), Guarant. 3 (3 Jean Calvin), Application Date (19.08.2015), Issued on (19.08.2015), and Status (Approved). An 'Update Status' button is at the bottom of this form. On the right, there is a table titled 'Loan Payment Transactions' with columns: Date due, Date paid, Princ. due, Princ. paid, Inter. due, Inter. paid, Receipt, Fined, and Updated. The table contains several rows of data, including a 'Total' row and a 'Remaining' row. Below the table, there is a 'Delete Last Transaction' button and a form for making a repayment with fields for Date Paid (21.10.2015), Amount Paid (UGX), Receipt No. (for Loan Repayment), and a checkbox for 'deduct from Savings'. A 'Make Repayment' button is at the bottom of this section.

Date due	Date paid	Princ. due	Princ. paid	Inter. due	Inter. paid	Receipt	Fined	Updated
19.09.2015	20.09.2015	141,665	118,750	21,250	21,250	1234	<input type="checkbox"/>	John Doe
20.10.2015		141,667		21,250			<input type="checkbox"/>	admin
19.11.2015		141,667		21,250			<input type="checkbox"/>	admin
20.12.2015		141,667		21,250			<input type="checkbox"/>	admin
20.01.2016		141,667		21,250			<input type="checkbox"/>	admin
20.02.2016		141,667		21,250			<input type="checkbox"/>	admin
Total:		850,000	118,750	127,500	21,250			
Remaining:		731,250		106,250				

4.3.2.1 Making a Repayment

In case of a repayment, please enter the **date** (by default the current date is assumed), the **receipt number**, and the **total amount paid** by the customer. Please also indicate whether the amount should be deducted from the customer's savings account.

The system will automatically divide the amount paid based on the idea, that the due interest for the month is always served first. This results in the following rules:

- In case the customers brings less than the due interest, the entire amount will be used to cover interest only.
- In case the customer brings more than the due interest but less than the total expected monthly rate (interest plus principal), interest will be cleared first and the remaining amount will be used on principal.
- In case the customers brings more than the total expected monthly rate, any excess money will be used to clear principal.
- In case a customer brings more than the total outstanding balance on both interest and principal, both positions will be cleared and excess money will be deposited on the customer's savings account.

Any payment of interest will reflect on the incomes side in the accounting section (see 5.2).

4.3.2.2 Error Correction

The mangoO system allows the user to always revert loan payment transactions. Clicking the delete-icon allows authorised users (see 7.5) to delete the respective transaction after entering a security captcha. This is a safety featurer to assure the willful execution of the delete command.

4.3.2.3 Defaulted Payments and Default Fines

In the Loan Payment Transactions list, due dates which lie in the past and have not been met, are indicated in red. In this case, the system will show a blue box below the payment section which allows you to charge a default fine. To do so, please enter the **date** (by default the current date is assumed), the **receipt number**, and the **total amount charged as fine**. You must also indicate whether the amount should be deducted from the **customer's savings account**. Kindly note that this is the **default setting**!

Make Repayment

Date Paid: 21.10.2015 Amount fined: UGX

Receipt No: for Default Fine ☒ deduct from Savings

Charge Default Fine

Export Statement

Any payment of a default fine will reflect on the incomes side in the accounting section (see 5.2). Please be aware that mangoO will always assume a default fine to apply to **all outstanding transactions**. Therefore, all currently defaulted payments will be marked as **Fined**.

4.3.2.4 Export Loan Statement

Clicking **Export** will generate an XLS file containing the complete history of transactions on this particular loan.

4.4 Entering a New Loan

In order to enter a new loan application, you first have to open the dataset of the customer (see 2.1) who wishes to apply for the loan. Provided the customer's membership status is **Active**, you will find an option in the upper menu bar called **New Loan**. Clicking it will allow you to fill a new loan application for that customer.

The screenshot shows a web browser window with the URL `127.0.0.1/mango/loan_new.php?cust=183`. The page header features the mangoO logo and a user profile for John Doe. A navigation bar includes tabs for Start, Customers, Loans, Accounting, and Reports. Below this is a secondary navigation bar with links: Back, Search, Deposit, Withdrawal, Add Shares, New Loan (highlighted), New Customer, Active Cust., and Inactive Cust.

The main content area is titled "New Loan Application for Sharan Beacham (183)". It contains a form with the following fields and values:

Principal:	1200000	Period:	6
Interest Rate:	2.5	Purpose:	Construction Work
Security 1:	Cows	Security 2:	Motorcycle
Guarantor 1:	161 Gwendolyn Kimt ▼	Guarantor 2:	32 Milda Mcamis ▼
Guarantor 3:	123 Margeret Pajak ▼		
Monthly Rate:	230000		
Repay Total:	1380000	Loan Fee:	12000
Date of Applic.:	23.10.2015	Receipt No:	for Loan Appl. Fee

A "Continue" button is located at the bottom center of the form.

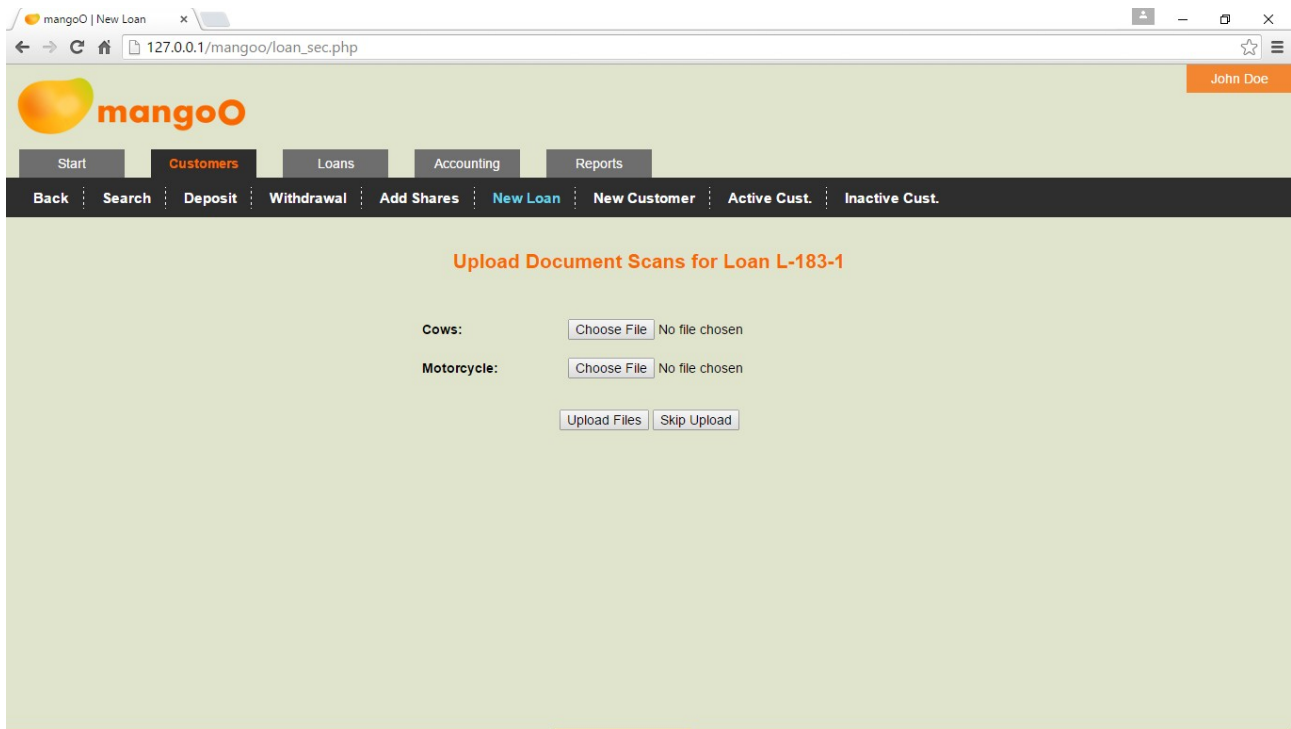

In order to enter a new loan application in the system, fill all compulsory fields. As soon as the information on principal, loan period, and interest rate is entered, mangoO will calculate the monthly repayment rate, the total repay amount, and the applicable loan fee.

By definition, guarantors can only be active members of the institution and must be selected from the lists.

On completion, please click **Continue**.

4.4.1 Uploading Security Related Documents

The next page allows you to upload documents that further describe the specified securities. Depending on the number of securities, mangoO will offer you one or two option for uploading. You may want to attach photos, scans, or other documents related to the securities. Those documents will later be accessible through the loan's details page (see 4.3.1).

In order to attach any document to a security, click **Choose File**, navigate to the location of the file on your computer, and select it for upload. The system will only allow you to choose PDF, JPG, JPEG, PNG, TIF, TIFF, DOC, DOCX, XLS, XLSX, ODT, ODS and TXT files.

Clicking **Upload** will upload all selected files to mangoO.

Should you not wish to attach documents to any of the securities, click **Skip**.

5 Accounting

mangoO Microfinance Management can also be used for internal accounting purposes. Under **Accounting** you will find three options **Expenses**, **Incomes** and **Annual Accounts**.

5.1 Expenses

Use this option to record all expenses of your micro-finance institution.

Date	Type	Amount	Recipient	Details	Voucher	Delete
25.01.2016	Internet	60,000 UGX	MTN	2GB data bundle	562	✗
19.01.2016	Airtime	15,000 UGX	Airtel	Airtime for Manager	201	✗
31.12.2015	Distributed Dividend	281,850 UGX		Distributed Dividend for 2015		✗

In order to record a new expense, enter all necessary information. Amount, recipient and payment voucher number are compulsory to include. Make sure to also choose an appropriate expenditure type from the list. (Expenditure types can be edited or amended by system administrators only.)

In order to enter the information into the system, click **New Entry**.

On the right-hand side, mangoO shows a list of all expenditures for past 60 days. Any further representation of accounting data is limited to the Reports section (see 6).

Clicking the delete-icon allows authorised users (see 7.5) to delete the respective transaction after entering a security captcha.

5.2 Incomes

WARNING: Under normal circumstances, this option is rarely ever needed! The mangoO system is designed to record all incomes automatically whenever they are generated from the institution's business. This means that payable fees, payments of interest, and other forms of income are captured automatically as they happen. However, instances might occur in which the manual recording of an income is inevitable. In this case, use this option to record such an income. Make sure this remains an exceptional incident!

In order to manually record a new income, enter all necessary information. Amount and receipt number are compulsory to include. Make sure to also choose an appropriate income type from the list. (Please note that income types can be edited or amended by system administrators only.)

In order to enter the information into the system, click **New Entry**.

On the right-hand side, mangoO shows a list of all incomes of the past 60 days. Further representation of accounting data is limited to the Reports section (see 6).

Clicking the delete-icon allows authorised users (see 7.5) to delete the respective transaction after entering a security captcha. Not all income types can be deleted from this list. Some, like Withdrawal fees, must be deleted by deleting the transaction that triggered this income.

5.3 Annual Accounts

This option is used to close a particular financial year and payout an annual dividend to customers. You may either enter a dividend per share or the grant total amount of your annual dividend.

In either case, mangoO calculates the proportion of dividend to which a customer is entitled based on the length of time the customer was holding his / her shares during the given year.

If the dividend was given on a *per share* basis, mangoO will credit every customer's savings account with an proportionate amount.

If the given dividend was the grand total, mangoO will first divide this amount by the number of eligible shares to calculate the dividend per share. Then, all eligible savings accounts will be credited with an proportionate amount. Please note that due to rounding differences the distributed total might not entirely add up to exactly match the initially entered amount.

6 Reports

Reporting is used to evaluate the institution's business activities. As this would typically be the work of management staff only, access to these reports is restricted to certain user accounts.

mangoO offers four different types of individual reports (Income Report, Expense Report, Loans Report, and Capital Report) plus two summarizing report types (Monthly and Annual Report). In order to generate a report, choose a type, select a timeperiod and the desired format in the light-blue menu bar, and click Select Report.

By default, mangoO offers to generate reports for the previous month of the current year.

Loan No.	Loan Status	Due Date	Due Amount
L 182-1	Approved	13.09.2015	108,333 UGX
L 100-2	Approved	19.09.2015	162,915 UGX
L 200-1	Approved	30.09.2015	133,200 UGX
Total Due Payments: 404,448 UGX			

Loan No.	Instalment Due	Recovered	Date
L 100-2	162,915 UGX	140,000 UGX	20.09.2015
L 200-1	133,200 UGX	15,000 UGX	29.09.2015
Total Recoveries: 155,000 UGX Loan Recovery Rate: 38%			

Loan No.	Customer	Principal	Interest	Period	Repay Total	Date Out
----------	----------	-----------	----------	--------	-------------	----------

Clicking **Export** above the list will generate an XLS file which can then be altered, printed, sent, or otherwise used outside mangoO.

Further types of reports can be programmed by your system administrator or supplier.

7 Settings

Please note that access to the system settings page is limited to users with the respective permission.

7.1 Basic Settings

The **Basic Settings** page shows several options concerning to system in general.

7.1.1 Dashboard

Here, the two halves of the user dashboard (see 1.1) can be configured. In case the auto-deactivation of unsubscribed customer accounts is activated (see 7.1.3), the left side of the dashboard will automatically be set to *Overdue Subscriptions*. In case auto-fining for defaulted loan instalments is activated (see XXX), the right side of the dashboard will automatically be set to *Defaulted Loan Instalments*.

7.1.2 Other Basic Settings

The system-wide *Currency Abbreviation* will be used in tables and input fields across mangoO.

The current *Value of Shares* will be used when customers purchase additional shares. mangoO maintains records of all changes in share values.

Setting a *Minimum Savings Balance* will prevent withdrawals that would reduce a customer's savings account to a balance below the specified amount. Setting this option to zero would allow customers to entirely empty their savings account.

7.1.3 Auto-Deactivation of Unsubscribed Customer Accounts

If the auto-deactivation option for customer accounts is enabled, all customers who have delayed the renewal of their annual subscription will automatically be set to *inactive* after the specified grace period (in months). Leaving this field empty will disable auto-deactivation.

Please note that as long as this feature is enabled, the left side of the dashboard will automatically be set to *Overdue Subscriptions* (see 7.1.1).

7.2 Loan Settings

7.2.1 Interest Calculation Method

mangoO supports two different methods of loan interest calculation.

The **fixed method** calculates the payable interest per month based on the loan's initial principal amount. This results in a fixed interest amount per month.

The **floating method** calculates the payable interest per month based on the remaining principal balance for the respective loan. This results in a reducing interest amount per month.

7.2.2 Auto-Fining Loan Defaulters

If the auto-fine option for defaulters is selected (see 1.1), loan default fines will automatically be charged and deducted from the defaulter's savings account after a delay that exceeds the specified grace period (in days). Please note, however, that using this option will allow savings accounts to drop to a balance below zero.

7.2.3 Other Loan Settings

The *Loan Interest Rate* is the percentage charged by default as interest on customer loans. Please note that this default rate can be individually adjusted for every loan application (see 4.4).

Loan Application Fee, *Loan Fee* (percentage), and *Loan Default Fine* are automatically charged by mangoO as they occur.

The values entered in *Minimum Loan Principal* and *Maximum Loan Principal* set the limits for any loan application.

7.3 Fees

This section allows to adjust all fees charged by your institution, such as Entry Fee, Annual Subscription Fee, Withdrawal Fee, and others. All these fees are charged automatically by mangoO as they occur.

Setting the **Annual Subscription Fee** to zero will deactivate all checks related to this fee.

7.4 Users

On this page, existing users can be edited as well as new ones added to mangoO. In order to create a new mangoO user, fill the fields on the left-hand side of the page. Remember that each user must be assigned to a user group (see 7.5).

In order to edit an existing user, click the Edit-symbol next to the user's record in the right-hand section of the page. Whenever you edit an existing user, make sure to also re-type the password, even when it did not change.

Passwords need to be at least six characters long.

For the primary user *admin* the user group cannot be changed.

7.5 Usergroups

The permissions management of mangoO is based on user groups. On this page, existing usergroups can be edited as well as new ones added to mangoO. In order to create a new usergroup, fill the fields on the left-hand side of the page. Choose the appropriate permissions for each group by using the checkboxes.

In order to edit an existing usergroup, click the Edit-symbol next to the usergroup's record in the right-hand section of the page. Remember that when changing permissions for a usergroup, all users in this group will hold these new permissions.

To delete a usergroup, click the Delete-symbol next to the usergroup's record. Please note a usergroup cannot be deleted while it still has members.

The primary usergroup *Administrator* can neither be changed nor deleted.

7.6 Log Records

The list under **Log Records** allows to monitor login and logoff activities of all mangoO users. In case a user forgot to log out from the system and his session was forcibly ended, the logoff time will show in red. Such a user will see a logout reminder message the next time he or she logs in to mangoO.
